## COLLISION DETAILS:

On January 8, 2023, the Las Vegas Metropolitan Police Department (LVMPD) Fatal Detail was notified of a delayed traffic-related fatality. On January 2, 2023, at approximately 2:07 p.m., an Automobile versus SUV traffic collision occurred at the intersection of Westcliff Drive and Antelope Way. The preliminary collision investigation, evidence at the scene, and surveillance footage indicated that a 2009 Nissan Cube was traveling south on Tenaya Way, which changes to Antelope Way south of the intersection, in the single southbound travel lane while approaching the intersection. A 2021 Toyota 4Runner was traveling east on Westcliff Drive in the inside eastbound travel lane while approaching the intersection. A collision occurred when the Nissan's driver failed to stop for a solid red traffic signal and impacted the Toyota in the intersection. The Nissan's driver was transported to UMC Trauma from the collision scene by ground ambulance with injuries determined to be non-life-threatening by trauma staff. The Toyota's driver remained at the collision scene with minor injuries and showed no signs of impairment. Based on the preliminary collision investigation details, the LVMPD Fatal Detail was not requested and did not respond to the scene.

On January 8, 2023, the LVMPD Fatal Detail was notified by the Clark County Office of the Coroner Medical Examiner that the Nissan's driver had succumbed to her injuries and was pronounced deceased at UMC on January 6, 2023.

The driver's death marks the 4th traffic-related fatality in the LVMPD's jurisdiction for 2023. This collision remains under investigation by the LVMPD Collision Investigation Section.
